

Odd Sights at Heights

Haunting photographs of a moonbeam rainbow
and a cloud ring too big to be true

Hovering like a giant's smoke ring, a great cloud appeared at sunset over Flagstaff, Ariz. last Feb. 28 and set off a continuing scientific mystery. Watchers struck by the cloud's odd shape and huge size, took pictures, like these four, at different times and from widely scattered locations in the state. Dr. James McDonald, a meteorologist at the Institute of Atmospheric Physics in Tucson, has been accumulating the pictures. Using them as the basis for trigonometric calculation, he has made a startling discovery that the cloud was at least 26 miles high and 30 miles across—"a lot higher and bigger," he says, "than a cloud should be." The circle was too high to be made by a jet plane, and so far as Dr. McDonald can determine, there were no rockets, rocket planes or bombs being tested nearby that day. He hopes anyone else with pictures will lend them to him, for he would like some more clues about the cloud 26 miles up—no water droplets exist at that height to make a cloud.

[In the photo on the left, notice the size of the cloud in comparison to the ground below. Note: These photographs and article are from the May 17, 1963, *Life* magazine.]

Cloud of Seven Angels

Many photographs were taken of this cloud as it appeared on February 28, 1963. The following week, Brother Branham was up in the Sunset mountain area hunting when these seven angels that formed this cloud met him and told him to go preach the seals, which he did on March 17-24, 1963. These sermons and many others preached by Brother Branham are available in both audio and in text formats. Look at the "Sermons" section on www.TucsonTabernacle.info for places for free sermon downloads or places to purchase them as booklets.

**After seeing the cloud picture in the *Life* magazine,
Brother Branham made these comments...**

One day, turning it [the picture] to the right, looking, there was Jesus Christ just as perfect as Hofmann ever drew Him. It was standing there with a white wig on, looking back down towards the earth, showing that He's Supreme Authority. The heavens declare it; the Bible declares it; the Message declares it. It's all the same: Supreme Authority, with the white wig on. You see His black beard under it. Many of you have seen the picture. We got it back there. Just turn it to the right, sideways; look at it. There He is, just as perfect as it was— if it would be photographed of Him. They're looking at it from

the wrong angle. You got to look at it in the right angle. And only the Lord God can reveal which is the right angle. Turn it to your right and look at it. There He is just as perfect, and it'd been photographed up there.

[Spiritual Food in Due Season, July 18, 1965 pm, Jeffersonville, Indiana]

Some people have overlaid a copy of Jesus' face from Hofmann's "Christ at 33" (photo on the left) inside the cloud picture (photo on the right). We do not agree with doing this since it is not the way the original photograph looked. Many people (especially those outside of the USA) have seen that combined print and don't know that someone has altered the photo. Unfortunately, they think that combined picture was what the cloud looked like when it was photographed in the sky on February 28, 1963. This has caused some doctrines to form that have caused divisions.
